Presented or Sap in the Winter.—A remarkable paper has recently been contributed to a German magazine, by Prof. Mohr, showing not only that the sap does not freeze in trees and plants which live through hard winters, but also the reason to freeze in trees and plants which live through hard winters, but also the reason that the budget it is true water as we generally see and will declare the same that though it is is true water as we generally see and understand it, freezes at thirty-two degrees, it does not freeze at thirty-two degrees, it does not freeze the same that the sap does not do so when its particles are finely divided. Tropical plants have large cells, and these are the ones in which the sap divided. Tropical plants have large cells, and these are the ones in which the sap divided. Tropical plants have large of the same sort. It is not to do so when its particles are finely divided, there is no freezing of the inquist until after the structure has received injury of some sort. This is true he says of insects and insect pups. They never freeze; but cut one apart, soon after the humors solidify, and on thawing life flies.

If The bog of the Marshpee Manufacture of the says of the section of the says of insects and incaptured shortly after 2 F. M., and the match of travelling horses, which were directed to reach match. There were only three trials are the says of insects and incaptured shortly after 2 F. M., and the match of travelling horses, which were directed to reach match. There were only three prevents and the second class, single horses were matched and were required to draw 3000 pounds of coal at a dead start. Two premiums were offered to reach match. There were only three prevents and the second class, single horses were matched and were required to draw 3000 pounds of coal at a dead start. Two premiums were invested to wagon, owners to drive, for three premiums, 320, 325, 10. The race was eventy-sixth year, at the decidence of the second clas

There is no reason for pointing two Fairs and drawing \$12,00, in pointy from the State within the same terms with the Bristol Co., which is the something so new as to excite wonder among the most experienced financiers. It is a pity to run both. Why not railroad values. Hence it involved chiefly, id and parent Society. There is no reason for among the most experienced financiers. It though not wholly, those houses whose deal- and unprotected. ings were in values of that character. Legitimate trade has not been affected, or if it

## NEW PUBLICATIONS.

The canals will now shortly be closed, and there will be such an amount of products to be brought from the interior to the seaboard as never was known at this season before. It is expected, according to custom, that the railroads will at once put up their freight rates, for the simple reason that they that the railroads will at once put up their freight rates, for the simple reason that they have it in their power to do so. And to that same extent will the export trade of the country be hurdened more than it is now. Europe stands waiting for all the grain and flour we can send her, but those who own and run the machinery of transportation are able to demand such tolls of her, and of her.

The Gaiszy spreads a brilliant table again, attract.

The Gaiszy spreads a constant of the Gorona de cure (whos first taken) Choles, Director Croup, Colle, and Ges. Sickness. Valuable Information. Bosros, Dec. 12, 1869.
Gentiemen—My only object in giving you this testimonial is to spread valuable information. Having been badly afflicted with Batt litheum, and the whole surface of my skin being covered with pimples and eraptions, many of which caused me great pain and annoyance, and knowing it to be a blood disease, I took many of the advertised blood preparations, among which was any quantity of Sarsaparilla, without obtaining any benefit, until I commenced taking the Vusarina; and before had competed the first bottle I aw that I had got the right medicine. Consequently I followed on with it until I had taken seven bottles, when I was pronounced a well man, and my shin is smooth and entirely free from pimples and cruptions. I have never subject signoid ness the before and I attribute it all to the use of Vusarina. To benefit those afflicted with absumation, I will make mention also of the Vusarina's wonderful power of curing me of this acute complaint, of which I have suffered so internety.

Iron in the Blood

MAKES THE WEAK STRONG.

The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitalizing Agent, Iron in the blood, and cures "a thousand ills," simply by Toning up, Invigorating and Vitalizing the System. The enriched and vitalized blood permeates every part of the body.

Fitalizing the System. The enriched and vitalized blood permeates every part of the body,
repairing damages and waste,
searching out morbid secreflons, and leaving nothing for
disease to feed upon.

arret, for this prairie farm house has a arret, for this prairie farm house has a arret, for this prairie farm house has a arret.

The morning on which our story begins is lovely one in early spring. The long, low itchea has two occupants, an elderly woman dusy with some cooking, and an elderly woman dusy with some cooking, and an elderly woman dusy with some cooking, and an elderly man observe would help her bear her humiliating own through the fresh morning air came way nor the other. That you could stay her as long as you would, and that's God's truth, Dell."

"Thank you, uncle," answered the girling every nook and corner with its meliging every nook and corner with its meli

I hadn't thought of it much," he answered, them than could a new-born babe. "

"Yes. And Dell is mighty short sighted not to take him. There ain't another such a rich man in the county. He'll never ear a poor man's bread. She'll never get such too her chance."

"Yes. And Dell is mighty short sighted and often berated the doctor and Dell—and indeed, every one who came about her—because she did not improve faster.

One day when Mrs. Perry had been more than usually fretful, and Dell's patience was

Any further remarks were cut short any the appearance of the girl herself. She was not a heauty. Her mouth was too large and her nose too small; but her complexion was good and her eyes large and "kind looking," and her brown hair hung in long curls about her plump shoulders. But her chief sitration lay in her cheery voice and lively manners.

She was no exotic. She had bloomed shu biosomed like a prairie rose; and her mind, though far in advance of those around her, was in sympathy with all.

Her aunt was not the most amiable of women. Indeed, she was decidedly the reverse, as Dell and Mr. Perry had long since discovered. Scolding was her element, and no matter if Dell galloped over the prairie on Gyp's back with her hair "a-flyin," or walked demurely by the side of her uncle, the old lady was suited with neither. The
